SECRETARY HUGHES PRESIDES OVER CONFERENCE

GOLD ZONE STRIKE IS EXTREMELY IMPORTANT

The showing on the Gold Zone mine in the Divide district is better than ever before in its history, according to H. R. Bradley, superintendent in charge. That the property is destined to give a good account of itself from a production standpoint in the immediate future is now admitted by mining men who have examined the workings, in view of the fact that 7 feet of ore, having a length of 40 feet, has been exposed that carries average values of \$48.10 a ton.

Mr. Bradley gave out an official statement today concerning developments that have been going forward, as follows:

About October 1 a shoot of ore was cut 40 feet above the 500 level in 506 raise, which averages \$48.10 across 7 feet. At that time nothing was given out regarding the strike, as the management was desirous of proving whether or not it had a strong orebody. Another raise was then started 100 feet to the south-west of 506 raise, and at a point 10 feet above the level ore was encountered that samples from \$42 to \$140

3000 ARRESTS AFTER ATTEMPT KILL MINISTER

(By Associated Press)
RIGA, Nov. 12.—News received here from Moscow says an attempt has been made to assassinate M. Chicherin, Russian soviet foreign minister. The attempt was unsuccessful, according to the dispatch, which added that 3000 arrests had been made.

BLUEBEARD IS NOW CLAIMING TO BE INSANE

(By Associated Press)
VERSAILLES, France, Nov. 12.—An attempt to establish the fact that Henri Landru, modern "Bluebeard," is insane, will be made at his trial, in progress here. Landru is charged with the murder of 11 persons, 10 of them women he promised to marry.

IDLE SITUATION IS SOMEWHAT RELIEVED

(By Associated Press)
DETROIT, Mich., Nov. 12.—Improvement in unemployment conditions here is shown in the weekly report of the Employers' association. The 79 member firms during the week added 4339 workers to their forces, bringing the total of employed to 115,802.

AMERICA'S CONCRETE PROPOSAL CRUX OF ARMS CONFERENCE IS PRESENTED OPENING SESSION

(By Associated Press)
WASHINGTON, D. C., Nov. 12.—America's concrete proposal for limitation of naval armament, the crux of the arms conference, was presented by Secretary Hughes at the very opening of the first session today. Briefly it is as follows:

"1. That all capital ships building programs, either actual or projected, should be abandoned.

"2. That further reduction should be made through scrapping certain of the older ships.

"3. That in general, regard should be had to the existing strength of the powers concerned.

"4. That capital ship tonnage should be used as a measurement of strength for navies and a proportionate allowance for auxiliary combatant craft prescribed."

The United States program would scrap all capital ships under construction, 15 in number, and 15 older battleships. Great Britain would stop construction on her four new ships of the Hood type, and scrap all her second and first line battleships up to the King George V class. Japan would abandon plans for two battleships and four battle cruisers not yet laid down and in addition would scrap three capital ships, four battle cruisers in process of construction, and all ten of the pre-dreadnought and battleships of the second line. As the replacement program, the American government proposed that

no more ships be laid down for the next 10 years, and that the maximum replacement tonnage figure be fixed providing eventually for 500,000 tons for the United States, the same for Great Britain and 300,000 tons for Japan. Mr. Hughes was elected president of the conference, and John W. Garrett, of Baltimore, former minister to The Netherlands, was selected secretary general.

The United States is now completing its 1916 program calling for 19 new battleships and six battle cruisers. One battleship has been completed and the others are in various stages of construction, in some cases from 60 to 80 per cent of the construction having been done. On these 15 capital ships now being built over \$320,000,000 has been spent. Still, the United States is willing in the interest of immediate limitation of naval armament, to scrap all these ships.

Briefly, the American proposal is: "That there immediately be destroyed by the navies of the three great powers 60 capital fighting ships and a total tonnage of 1,575,043 tons. Within three months after making the agreement the navies would consist of designated agreed-upon ships as follows: United States 18; Great Britain 22; Japan 10. In tons this would be United States, 500,000; Great Britain 604,450; Japan 292,700. "With the acceptance of this plan, the burden of meeting the demands

of competition in naval armament will be lifted," said Hughes. "Enormous sums would be released to aid the progress of civilization. At the same time property demands of national defense will be adequately met and the nations will have ample opportunity during the naval holiday of 10 years to consider their future course. Preparation for future war shall stop now. I shall not attempt at this time to take up other topics which have been listed on the tentative agenda proposed in anticipation of this conference."

The American armament limitation plans as outlined by Secretary of State Hughes were described by Admiral Baron Kato, of the Japanese delegation, as very far-reaching but a good proposal to have been placed before the conference.

The Japanese government has not contemplated submitting a counter-proposal, said Baron Kato, adding that determination of this question would await a more complete study of the details of Secretary Hughes' plan. Asked if the American proposal would be accepted by Japan, Kato said: "As the basis for discussion the American proposal might be acceptable." The baron added that although it was too soon to express a definite opinion on the subject, his impression was that "Japan would comply with the American proposal so far as possible."

ROBBERS LEAVE SIX DOLLARS IN ILLINOIS BANK

(By Associated Press)
ALTON, Ill., Nov. 12.—Six men today held up the Illinois State bank at East Alton, severely beat the cashier and assistant cashier, and escaped with \$12,000, leaving, according to directors of the bank, only \$6 in the institution. The robbers escaped in an automobile.

SETTLEMENT OF IRISH PROBLEM NOT GIVEN UP

(By Associated Press)
LONDON, Nov. 12.—The Pilder cabinet rejected the government's plan for settlement of the Irish question on the ground that it contained fundamental principles which under existing conditions were impossible of attainment. The Pilder ministers, however, are putting forward counter-proposals.

CLEMMERS HAVE GIRL

In reporting the birth of a daughter which arrived at the home of Mr. and Mrs. Harry Clemmer, who reside on University avenue, the name appeared Olyanor by mistake, and the Bonanza hastens to make the correction. The young lady arrived Wednesday afternoon and is about the cutest piece of femininity that anyone would wish to see.

EXTENSION SHIPMENTS SHOW REAL ACTIVITY

Operations at the Tonopah Extension continue without interruption, and during the week a shipment of bullion was made, consisting of 22 bars, weighing 35,675.63 ounces and having a value of \$43,000. This was the result of the clean-up for the last 12 days of October and was in keeping with that produced during past months.

During the week ending Thursday, November 11, a total of 288 feet of underground work was performed, operations being centered on the 1200 and 1500 levels of the McKane shaft, and on the 1600, 1580, 1750 and 1850 levels of the Victor shaft, and a splendid showing of ore is in evidence as can be determined from reading the official report, which follows:

McKane Shaft

"1200 Level—1292 crosscut advanced 26 feet in West End drift. 429 crosscut advanced 32 feet in underground."

"1500 Level—1510 raise made usual advance with no change. Winching of 1517 crosscut made good progress."

BELMONT PREPARING FOR LONG SEIGE OF MINE DEVELOPMENT

The Tonopah Belmont Development company, one of the most aggressive corporations in the Tonopah district, is a busy place, and development continues throughout the big mine with highly gratifying results. During the week ending Thursday, November 10, a deal was consummated whereby the company purchased the Harrington house on Florence avenue, which will be used as a boarding house for many of the miners employed. In addition, a lease was taken on the Comstock house in order that sufficient accommodations may be available. This action was taken to provide suitable quarters for the miners during the winter months.

The official report of development at this property during the week ending February 10 follows:

"700 Level—East drift 725, off northwest crosscut 702, 725 vein, 1 foot low-grade ore. East drift 729, off northwest crosscut, 729 vein, 1 foot low-grade ore. Raise 20, off west drift 728, 729 vein, 2 feet low-grade ore.

"800 Level—West crosscut 8047, off north crosscut 8037, mining purposes in footwall of North vein. South-west crosscut 8051, off north crosscut 8050, mining purposes, stopped temporarily. Southwest crosscut 8052, off stope 845 sill, prospecting for faulted segment of North vein. Raise 61, off west crosscut 8047, prospecting for North vein. Raise 64, off southwest crosscut 8048, prospecting for North vein. Raise 62, off stope 894, Shoestring vein, holed to west drift 720.

"900 Level—West drift 8035, off northeast crosscut 928, Favorite vein, 2 feet of good ore. West drift 9039, off west drift 9035, Miscellaneous vein, 1 1/2 feet milling ore. Raise 75, off north crosscut 979, Rhyolite vein, holed to east drift 8039. Raise 89, off east drift 9010, Rhyolite vein, face of mixed ore, low-grade. Raise 91, off west drift 9041, Favorite vein, stopped and stope started.

"1000 Level—South crosscut 10071, off east drift 10005, prospecting footwall of Rescue vein. West drift 10073, off south crosscut 10017, Rescue vein, 1 foot low-grade ore. Raise 93, off southwest crosscut 10053, prospecting for South vein. Raise 106, off stope 10005, prospecting hanging wall of Rescue vein. Raise 117, off east drift 1004, prospecting for Mizpah Fault vein. Raise 118, off north crosscut 1008, prospecting for Mizpah Fault vein. Raise 120, off west drift 1078, following 2 feet low-grade ore on Favorite vein.

"1100 Level—Northwest crosscut 11002, off west crosscut 11001, prospecting footwall of Belmont fault. West drift 11006, off south crosscut 11003, Miscellaneous vein, 1 foot low-grade ore. South crosscut 1150, off southwest crosscut 1147, prospecting and cut 1 foot of fair ore. Raise 123, off south crosscut 1198, prospecting for Rescue vein.

"1160 Level—West drift 2, off north crosscut 5 Favorite vein, 2 1/2 feet of milling ore. South crosscut 35, off east drift from 1056 winze, prospecting footwall of Mizpah fault.

"1300 Level—Southeast crosscut 1231, off east drift from Belmont shaft, prospecting footwall of Belmont vein."

MRS. OBERCHAIN LOSES FIGHT TO ESCAPE TRIAL

(By Associated Press)
LOS ANGELES, Cal., Nov. 12.—The Second district court of appeals today denied the petition of Mrs. Madalynne Oberchain, indicted on a charge of murder of J. Belton Kennedy, asking Judge Reeve, of the Los Angeles county superior court, be directed to show cause why she should not be either tried or liberated at once.

Mrs. Oberchain's counsel sought to have her released or tried, claiming she had been held over 60 days without trial and was entitled either to dismissal or trial. Judge Reeve took the position that continuances in her case, which had brought it over the 60-day limit set by state law, were granted at her request, and therefore her rights had not been infringed.

YALE BEATS PRINCETON

(By Associated Press)
NEW HAVEN, Conn., Nov. 12.—The bulldogs of Yale tamed the Princeton tigers today at football, by a score of 13 to 7.

AFTERNOON PAPER CARRIES ALL NEWS

If you would read the news the day it happens, then you should subscribe for an afternoon paper. News in morning editions is simply a rehash of what has occurred the preceding day and it is generally conceded that the afternoon daily is fast supplanting the morning paper. Morning editions carry no late reports and all news is closed over the wires by 10:30 o'clock at night. On the other hand, the afternoon papers receive wire reports up until 4 o'clock, which is an assurance that all the important features of the day's news are contained.

HONOR IS PAID ARMISTICE DAY BY TONOPAHNS

One of the most pleasing patriotic demonstrations that ever took place in Tonopah was witnessed yesterday morning in the Armistice day observance. Honoring of the departed heroes who gave their lives that the United States should remain the most powerful and just nation in the world, and paying tribute to the members of the American Legion who were willing to sacrifice their all and bring beastly to an everlasting close, was exemplified in Tonopah with the most appropriate exercises that one could wish.

Old, young and middle-aged participated in the observance of this most memorable occasion in the history of the world. Promptly at 10:30 in the morning members of the American Legion to the number of 40 marched from the Elks home to the schoolhouse where they gathered into the fold every pupil in the school, who were in waiting. Headed by the Tonopah Musicians' band, the march was then made from the school to the Lathrop-Dav's corner, and there the veterans of the Civil and Spanish-American wars joined the procession, leading the members of the American Legion. Only two G. A. R. veterans were in line, J. A. B. Jordan and A. W. Carl, Edward Harmer, for 20 years the exclusive color bearer in Tonopah, was absent on account of being confined to a hospital owing to infirmities of advanced age.

The march was made down Main street, the grades following in respective order, commencing with the Little tots, each class being in charge of its teacher, until the high school students wound up the rear. Upon reaching the corner of Oddie avenue a turn was made and the marchers proceeded back to Brougher avenue, where they encircled the flagstaff. Fully 900 people, including old and young, made up the procession and the patriotism that was exhibited brought one back to those days of previous to three years ago when we were waging a fight against

DIVIDE EX. IS STILL SHOWING BROKEN VEIN

There has been no material change in conditions at the Divide Extension during the past week, but operations are being prosecuted with vigor on both the 100 and 200 levels. On the 200 level drifting is going ahead from the crosscut that was extended to pick up the vein where the fault occurred, and there is some improvement reported, although the vein is slightly broken up.

While Divide Extension shares showed some strength during the past week, and the report was circulated that a rich find had been made, such was denied at the office of the company. The reported discovery made in the Gold Zone workings gave strength to Divide Extension shares, but regarding any find being made on the first named property the management is inclined to be reticent, official news concerning the mine being given out exclusively from the New York office.

Some ore is being mined on the 100 level of the Divide Extension, but shipments have been curtailed for the present.

ENGINEERS INSPECT DEATH VALLEY MINE

Fred Holmes, in charge of operations at the Silver Hills Nevada Mines company property at Tule canyon, accompanied by F. C. Merritt, mining engineer of San Francisco, returned yesterday from a visit to Death valley, where they had been inspecting the Ashford gold property.

brutality, beastly and one-man domination of the world. The line of march covered three blocks and as the children passed down the streets they were greeted with loud applause.

The float of Betsy Ross proved a real attraction of the parade, and the little folks taking part in the east dressed in attire of Puritan

(Continued On Page Two.)

USUAL PRODUCTION IS MAINTAINED BY WEST END COMPANY

The usual production was maintained by the West End Mining company for the week ending Wednesday, November 12, and consisted of 1700 tons with values about \$100,000. There is great activity at the well-known property and the workings are in keeping with that of the past several months.

The official report as given out this morning follows:

"West End Shaft.
"From the West End shaft on the 400-foot level, 413 west drift made a small advance in low-grade ore. Crosscut 413 A made fair progress in trachyte. On the 500-foot level, raise 544 A made fair progress with no change. Drift 545 was driven ahead in low-grade ore. On the 600-foot level, drift 530 No. 2 advanced on a full face of low-grade quartz and drift 530 No. 3 made fair headway on low-grade quartz. Intermediate drift 683 made the usual headway in siliceous rhyolite and quartz. Raise 968 from the 964-foot level made good headway with no change.

"Ohio Shaft.
"From the Ohio shaft, workings drift 525 made a connection on low-grade ore. Crosscut 548 has been discontinued and raise 550 started to intersect the vein. A small footage was made in 549 drift with no change to report. Work has been resumed in drift 555 No. 10 on a face of low-grade ore. On the 800-foot level, work in crosscut 848 has been resumed on a face of low-grade ore. Good progress was made in 862 crosscut without change. Raise 865 has been temporarily discontinued. Work in 870 raise has been resumed with no change in conditions. On the 1100-foot level, raise 1106 has been temporarily discontinued. Stopping was carried on on the West End Hanging-wall and Ohio veins and tonnage and grade of ore produced

was normal and satisfactory. Tonnage was about 1700 tons for the week."

BALTIMORE'S MAYOR SNUBBED BY LEGION

(By Associated Press)
BALTIMORE, Md., Nov. 12.—Publicly resenting what they considered an insult to them on the part of Mayor William F. Browne, members of Baltimore post, Twenty-ninth Division association, dropped out of the Armistice day procession yesterday as it neared the reviewing stand, turned their backs on the mayor as he began an address, and marched away.
